

**Alzheon To Present At Two Upcoming Conferences: Geneva-Springfield Symposium on Advances in Alzheimer's Therapy and BioCentury Future Leaders in the Biotech Industry**

LEXINGTON, Mass., March 19, 2014 – Alzheon, Inc., a clinical-stage biopharmaceutical company focused on brain health, memory and aging, announced today that the company will present at two upcoming conferences: the 13<sup>th</sup> International Geneva-Springfield Symposium on Advances in Alzheimer's Therapy and the 21<sup>st</sup> Annual BioCentury Future Leaders in the Biotech Industry investor conference.

Mark Versavel, MD, PhD, MBA, Chief Medical Officer of Alzheon, will make the presentation at the Geneva-Springfield Symposium on Advances in Alzheimer's Therapy at 5:20 PM CET (11:20 AM ET) on Thursday, March 27, 2014, at the International Conference Centre in Geneva, Switzerland. The presentation titled "ALZ-801, a Novel Prodrug of Tramiprosate Which Improves Cognition and Function in ApoE4 Positive in Alzheimer's Disease Patients" will provide an overview of the clinical data and subpopulation analyses in more than 2,000 Alzheimer's patients from Phase 3 studies with the parent molecule tramiprosate, supporting and guiding the development of Alzheon's lead clinical candidate prodrug ALZ-801.

Martin Tolar, MD, PhD, Founder, President and CEO of Alzheon, will present at the BioCentury Future Leaders conference at 2:00 PM ET on Friday, March 28, 2014, at the Millennium Broadway Hotel in New York, NY. Dr. Tolar will provide an overview of Alzheon's drug development approach and pipeline in Alzheimer's disease, including the clinical program for ALZ-801 to start confirmatory pivotal Phase 2/3 study in early 2015 in Alzheimer's disease patients positive for ε4 allele of the apolipoprotein E.

At the time of the conferences, both presentations will be available on Alzheon's website [www.alzheon.com](http://www.alzheon.com), under Press Releases.

**About Alzheon**

Alzheon, Inc., is a clinical-stage biotechnology company focused on brain health, memory and aging, developing innovative treatments for Alzheimer's disease and other neurodegenerative disorders. Alzheon pursues drug development programs with an established safety profile that have previously been tested in extensive efficacy studies in Alzheimer's disease patients, and where new insights into a disease or molecule can be

applied. Based on a drug development platform that yields diverse and novel compounds, the company is building a pipeline of innovative drugs to target the underlying pathogenesis of neurodegeneration in order to improve the symptoms and slow the progression of these devastating diseases. Our lead product candidate, ALZ-801, is a first-in-class small molecule inhibitor of amyloid aggregation and neurotoxicity, and is advancing into a confirmatory pivotal Phase 2/3 study for certain patient populations with Alzheimer's disease or at risk for the disease. Alzheon has world-leading capabilities in drug development for Alzheimer's disease and related disorders, and we apply state-of-the-art clinical development approaches to improve the likelihood of success with product candidates in our pipeline, as well as additional therapeutic assets from in-licensing. Alzheon is located in Lexington, Massachusetts, USA. For more information, please visit [www.alzheon.com](http://www.alzheon.com).
